## Cutting Heat Costs This Winter

- ◆ Cut up to a fifth of your bill by sealing exterior wall air leaks and drafts.
- ◆ If there are leaks or holes in your ducts, use sealant or metal tape. Air leaks in ducts can account for about 20 to 30% of wasted heat.
- ◆ Lower the temperature while sleeping or away. A programmable thermostat can save up to 15%.
- ◆ Water heaters account for nearly a fifth of heating bills. Set yours to no more than 120°.
- ◆ Open drapes on sunny days and change the furnace filter monthly.
